KARUNA TATA

+91 7981518902 karunatata63@gmail.com https://www.linkedin.com/in/starlightknown/ https://github.com/starlightknown

Skills

Languages	Python, Go, Bash, HTML/CSS, Javascript, Typescript, Node JS, Markdown, SQL
Frameworks-tools	Django, Flask, GitHub, Git, VSCode, IntelliJ, Figma, Postman, Docker, Kubernetes, Cypress
Platforms	Ubuntu, Fedora, Arch, Windows, Google Cloud Platform

Education

Bachelor of Science, Data Science Aurora's Degree and PG College (GPA - 8.45)

Experience

Member of Technical Staff **June 2024 — Present**
DevRev Bangalore, India

- Transitioned from Technical Writer to Front-End Software Engineer, leveraging domain expertise and technical knowledge to enhance user interfaces and improve user experience.
- Took ownership of the Timeline and Updates Page, key features that display user comments, and notifications. Implemented reminders on work items and notifications, similar to the Slack reminders and the translate comments feature.
- Enhanced rich text editor with features like AI text enhancer, text color changer, and formatter.
- Optimized web performance by reducing API calls, improving real-time event updates, and improving UI responsiveness.
- Developed the Direct Messaging (DM) feature within DevRev, which allows: Connecting messages to work items for seamless reference. Start chats from tickets, enhancements, or dashboards. Summarize conversations into chapters for retrospection. Capture all communication in-app. Enable personal and group contextual chats. Integrated omnipresent AI search agent to DM objects for easy adoption across mobile, desktop, and web applications.

Technical Writer **May 2023 — June 2024**
DevRev Bangalore, India

- Improved information architecture using the Diátaxis framework, resulting in increased user engagement.
- Authored and edited end-user and developer documentation, including tutorials, guides, and conceptual overviews, using a docs-as-code approach.
- Collaborated with cross-functional teams to create engineering diagrams and code samples for REST APIs.

Technical Writer (Intern) **May 2022 — Dec 2022**
Google Season of Docs - AsyncAPI Remote

- Contributed to improving the **accessibility** and inclusiveness of the website.
- Wrote **end-user tutorials** and how-to **guides** from scratch and improved the documentation structure following the style guide. Learned and implemented Information Architecture, and classified content under chosen content buckets.
- I wrote sample code for tutorials to assist visual learners and created engineering diagrams with mermaid.js.Check out my written samples here
- Contributed to the AsyncAPI website section to display testimonials using Next js and Vercel.

Co-curricular Activities

- Speaker, Kubecon + CloudNativeCon EU 2023: Presented "The Cloud Native Way of Technical Writing".
- Speaker, Codebar 2023: Presented "Bash it Up: Scripts Simplifying Life", a talk about Bash scripting.
- Speaker, KubeCon + CloudNativeCon at North America 2022: spoke about how students can get into Cloud Native via Hackathons.
- Head of Sponsors and Co-organiser of the CodeDay Hyderabad 1.0 and 2.0, the largest 24-hour high school student coding event in Hyderabad, India.
- Speaker, GirlCode Open Source Day: Shared best practices for contributing to open-source projects.
- Organizer, Azure Dev Day Hyderabad: Hosted an event attended by 200 participants, focusing on Azure development.

Certifications

- Ubuntu Linux: Essential Commands and System Administration
- DevOps Foundations: Continuous Delivery/Continuous Integration
